Eksamensoppgave i TMA4175	5 Complex	k analysi	S
Faglig kontakt under eksamen: Yurii Lyub Tlf: 91647362	arskii		
Eksamensdato: 31. may 2017 Eksamenstid (fra-til): 09:00-13:00 Hjelpemiddelkode/Tillatte hjelpemidler: I Bestemt, enkel kalkulator tillatt.	B: Alle trykte o	og håndskrev	ne hjelpemidler tillatt.
Målform/språk: bokmål Antall sider: 1 Antall sider vedlegg: 0			
Informasjon om trykking av eksamensoppgave Originalen er: 1-sidig □ 2-sidig ⊠ sort/hvit ⊠ farger □ skal ha flervalgskjema ⊠	-	Dato	Kontrollert av: Sign

**Oppgave 1** Give geometric description of the set  $\{z \in \mathbb{C}; |z-i| = |z-1|\}$ .

Oppgave 2 Find all harmonic conjugates to the function

$$u(x,y) = x^2 - y^2 + 2xy$$

.

Oppgave 3 Evaluate the integral (taken in the controlockwise direction)

$$\int_{|z+1|=1} \frac{dz}{(z^2-1)(z-1)^2}.$$

Oppgave 4 Evaluate the integral

$$\int_0^\pi \frac{\cos^4 \phi}{1 + \sin^2 \phi} d\phi$$

**Oppgave 5** Find the linear fractional mapping w = w(z) such that w(i) = 0,  $w(\infty) = 1$ ,  $w(-i) = \infty$ . Find the image of the half-plane  $\{z \in \mathbb{C}; \operatorname{Re} z > 0\}$  under this mapping.

**Oppgave 6** Let a function f(z) be analytic in the strip  $\Pi = \{z \in \mathbb{C}; |\operatorname{Re} z| < \pi/4\}$ . Let also |f(z)| < 1 for  $z \in \Pi$ , and f(0) = 0. Prove that

$$|f(z)| < |\tan z|, \quad z \in \Pi.$$

Oppgave 7 Find the domain of convergence of the infinite product

$$\prod_{n=1}^{\infty} (1-z^n)$$

Oppgave 8

- a) Let  $D = \{z \in C; |z| > 1, 0 < \arg z < \pi/2\}$ . Find any conformal mapping of D on the upper halfplane.
- **b)** Let, as in **a)**,  $D = \{z \in C; |z| > 1, 0 < \arg z < \pi/2\}$  and  $D_1 = D \setminus \{z = re^{i\pi/4}; r > 2\}$ . Find any conformal mapping of  $D_1$  on the upper halfplane.
